Mortar ... Jeff O'Leary

Mortar: ASTM C 780

Introduction

This field method is "to formulate judgments, or ie. "evaluate" the mortar (4.2-Batch to batch variation)

- 1.4 Test results are not required to meet ASTM C 270 (there is more water in the field mortar, it will be weaker than the Lab mortar)
- 4.3 This standard has eight (8) test methods to assist in "evaluation", Annex A4 is best method
- 4.3.4 Annex A4—Mortat Aggregate Ration is best test
- 4.2 Test is to reflect the "batch to batch" variations
- 6.3 No test for hardened mortar
